What is your biggest takeaway message from each of the tasks for this assignment?
Our biggest takeaway for this assignment is how to create brushing and linking for a graph using d3.

b) Did both of you put your best effort into this assignment? If not, what obstacle got in your way and how can you avoid it in future assignments?
Both of us did put our best foot forward into this assignment. Some obstacles we had were in creating the brushing and linking as we had some issues on it working. In future assignments when we get into roadblocks similar to this we should try to attempt it to together rather than each of us attempting it on our own.

c) (Each partner individually) Name one contribution your partner made to this assignment that you are proud of.
Aadya: I am proud of my partner's contribution to the bar plot. The code is organized and easy to follow along with the right amount of comments, the bar plot was also well organized.
Preethi: I am proud of my partner's contribution to the scatter plots. Both scatter plots were well done and including all the required components.
